

RATCHET STRAP EN12195-2

- Designed to be attached to the lashing points in order to secure the cargo during transportation, moving, shipping and storage.
- Flexible and durable lashings made of high strength polyester strap and steel ratchets, with or without end fittings.
- Extremely quick and efficient tie down and release of load.
- It is less damaging on contacting cargo surfaces than lashing chains.
- Ratchet straps are available in various lashing capacities, lengths and configurations.
- Standard: EN 12195-2
- Option: Cr6 free galvanized ratchet buckle and end fittings.

Ratchet tie down is broadly classified into two groups :

1. Two Part Ratchet Tie Down
It is used to secure cargo while transportation in flatbed trailers, containers & open trucks.
2. Endless Type Ratchet Tie Down
It is used for bundling purpose.

ALWAYS:

- Inspect web lashings before use.
- Calculate the lashing force(s) required for the chosen method of load restraint.
- Select the capacity and number of web lashings to provide at least the calculated lashing force(s)
- Ensure the lashing points on the vehicle and/or load are of adequate strength.
- Position the web lashing so that the load is uniformly spread over its width and protect the web lashing from small radii, especially sharp edges.
- Ensure the web lashings are correctly tensioned.
- Exercise care when releasing web lashings in case the load has become unstable since the lashings were applied.

NEVER:

- Use web lashings to lift a load.
- Knot or tie web lashings.
- Overload web lashings.
- Use web lashings over a sharp edge without edge protection.
- Expose web lashings to direct heat or flames.
- Expose web lashings to chemicals without consulting the supplier.
- Use web lashings which are cut, have loose or damaged stitching, a damaged tensioner or damaged terminal fittings.
